

How to attach the Jungle Gym Wall Mount.

**** If mounting to any wall surface, please consult a Professional Contractor.**

The Jungle Gym Wall Mount is meant to be supported by cinder blocks or concrete walls. If used on any other surfaces please consult a professional contractor to use the proper materials and appropriate procedures. See the 'Material List' on the back for piece identification.

Step 1

Position the D-ring Webbing on the wall and measure from the extra D-ring so it is 84 inches from the floor. Using the top D-ring and Mounting Plate as a template, mark the first two hole locations. Be sure that the two holes form a line perpendicular to the floor as shown to the left.

Step 2

With a hammer drill, drill $\frac{1}{4}$ " pilot holes with concrete drill bit and finish with a $\frac{1}{2}$ " concrete drill bit. Then push in the Wall Anchors, **threaded end first** (noted with "Double 1/2 Drill") and tap into wall until flush.

Step 3

Assemble the Backing Plate, top D-ring, Mounting Plate, and screws together (shown below) and thread top screw into wall anchor, until the D-ring Webbing will stay in place in order to mark the last two holes of the bottom plate. Before marking, pull tight so that the nylon webbing lies flat against the wall.

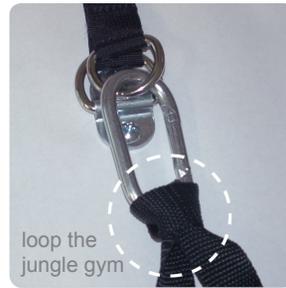

Step 4

Remove D-ring Webbing and plates (for ease of drilling holes) and drill last two holes the same way as the first two (step 2) with the hammer drill. Then push in the Wall Anchors, **threaded end first** until flush with the wall.

Step 5

Once again, assemble the top D-ring between the Mounting and Backing Plates (make sure the extra D-ring is facing out, away from the wall) and screw them into the top two holes until D-ring Webbing will stay in place. Then, after assembling the bottom D-ring with the remaining Mounting and Backing Plates, screw into the bottom two Wall Anchors. **Finish all screws and tighten securely.**

Step 6

The Wall Mount is ready for use. To attach the Jungle Gym, pull the Jungle Gym, by the center of the webbing, through the carabiner and loop it around itself, pulling hard so it won't slip, then attach the carabiner to the extra D-ring.

Enjoy your workout!

Wall Mount Material List:

(1)
D-ring
Webbing

(2)
Mounting
Plates

(4)
Wall
Anchors

(1)
carabiner

(2)
Backing
Plates

(4)
Anchor
Screws
